### Profile

I am a **passionate** and **conscientious** player, with a proclivity for **meeting deadlines**. I'd like to work for a company that promotes best practices and offers a variety of customer projects. Committed to high web design, user experience, usability, and speed for a diverse range of end-users.

### Skills

#### Tech Stack

*Agile, Bootstrap, GIT, HTML5/CSS3, SASS, Javascript, TailwindCSS, React.js, Next.js, Framer Motion*

#### Apps and Tools

*Adobe Photoshop, Adobe Illustrator, Adobe XD, Figma, Docker, Slack*

### Professional Experience

09/2021 – present

#### Worked On Portfolio

I have created my portfolio based on an online design I found on Figma. The website is Statically Generated and built with Next.js, which in comparison with React increases the page loading speed and adds additional SEO features.

During this project I have worked with:

- Framer Motion is a really cool library for React.js which allows creating animations at ease.
- TailwindCSS for basic CSS styling. This utility-first library allows me to create UI components extremely fast with an eye for accessibility.
- Additionally, I have used React-Intersection-Observer to trigger the animations on scroll.
- Firestore for the contact form.
- Swiperjs for the implementation of the carousel

06/2021 – present

### Worked On Other Minimal Websites

I have worked on other miscellaneous websites, which can be found in my portfolio section. I have styled them mainly using Bootstrap.

11/2019 – 12/2019  
Craiova, Romania

### Worked On Redesigning The Website of My University in Craiova

During my studies at the university, I engaged in redesigning the website for my studying department: <https://litere.ucv.ro/litere/>  where I practiced the basic layout of the websites.

## Courses

07/2021 – present

**Responsive Web Design**, *freeCodeCamp*

2021 – 2021
